NON FREEZING PLUME COIL

PRODUCT SUPPORT

The two stainless steel headers are totally removable for complete access and cleaning, for both headers and tubes. The “cover” type header design protects the coil from any damages for eventually freezing accident.

Benefits:

- No plume, till 2°C ambient and 80% relative humidity,
- Water savings till 80 %,
- Water treatment savings,
- Additional mechanical obstacle to drift : decrease of Legionella risk,
- The air drying reduces the drift propagation distance,
- High resistance to strong winter and maintenance conditions.
